Dump faster so you can get back to load up
SHAKE IT OUT WITH
BIG BERTHA™

■ We Believe in OFFERING AFFORDABLE PRODUCTS
  - Costs less than one new truck tire.
  - A fraction of the cost of a new bed liner and it works better.
  - No more slamming brakes, banging tailgate or jerking hoists to get material out (or using a back hoe or excavator).

■ We Believe in SIMPLICITY, LONGEVITY & QUALITY
  - Runs with a Simple push of a button from inside the cab, outside the cab, or by using remote control.
  - Will Outlast & Outrun the competition - bigger brushes, heavier, adjustable eccentrics provides more power & longer service life.
  - Fully enclosed housing keeps out road salt, dirt, water splash

■ We Believe CROSS CONTAMINATION SHOULD BE PREVENTED
  - Materials in your loads will be fully dumped so no more clean stone mixed with prior load of fill
  - No more Inspection Fines

■ We Believe ALL TRUCK TYPES DESERVE SOLUTIONS!
BERTHA works on all classes & styles of trucks
  - Class 6, 7, 8; on or off road; tri-axles; trailers; steel or aluminum truck bodies; belly or side dump; articulating, etc.

HC Trucking, Rhode Island
“Hauling hot asphalt in an aluminum body is tricky - and sticky - business. Without using our VIBCO vibrator, we'd be leaving a lot of product in the body at each dump site. With the cost of doing business these days, we are very happy to have a Big Bertha™ installed on our entire fleet.”
The most powerful dump truck vibrator available - 5000 lbs of force!

Rob H., Syracuse, NY
"My shop guys could NOT believe how easy it was to install the Big Bertha™ vibrator on my truck! Having everything included with it along with the instructions was a huge plus. They were done in no time."

VIBCO’s BIG BERTHA™
Mounting and Wiring Kit for the DC-3500 and DC-5000 is included with the vibrator. Optional mounting channel sold separately.

clay, fly ash, concrete, loam, gravel & more!
REDUCE DOWNTIME
and potential clean out injuries too! Bertha moves even
the toughest materials: clay, wet loam, concrete, hot
asphalt - QUICKLY, SAFELY, COMPLETELY.

WITH A BERTHA
BY VIBCO

WITHOUT A BERTHA

When the box raises high to dump the load, an
uneven base or soft soil can make a big difference
and can lead to disaster! The illustration (right)
shows how the center of gravity shifts creating a
real tipping danger.

The higher the box raises and the heavier the load stuck at the top,
the more dangerous the tipping situation becomes. When raising the
box to higher levels to remove loads you risk coming in contact with
power lines and potential deadly results.

A Big Bertha™ can greatly reduce the tip-over risk by getting the load
out of the top of the box while the angle of the bed is lower, (creating a
lower center of gravity).

Choose SAFETY & Efficiency!
Choose Big Bertha™!
