**Vibrating Tables**

**TEST TABLES**
- Simulate Handling & Transportation Shocks
- Stop Costly Field Service Calls
- Handles Both Sub Assemblies & Complete Chassis
- Verifies Integrity of Electric Circuits
- Removes Dangerous Residue
- Safe! No Harm to Sound Circuits
- Detects Masonry Connections
- Inexpensive Full Range Control

VIBCO’s exclusive patented free top table design ensures full, even vibration in all areas of the table top. Coaxiality and reliability of testing is assured. VIBCO’s wide choice of variable and constant frequency equipment gives the ultimate in high cost product reliability testing. Choose from standard 24” x 24” x 36” high tables or special tables designed for your particular requirements.

For more information ask for VIBCO’s complete test tables brochure.

**COMPACtion TABLES**
- Heavy duty for maximum loads
- Standard or custom made to specification
- Speed and impact adjustable

VIBCO’s compaction tables can be supplied with pneumatic or electric vibrators. Most are both speed and force adjustable. Heavy-duty construction. “Built in” versatility means these tables can be used for packing, settling, casting concrete, as well as fatigue testing. Vibration is isolated from the frame with inflatable air mounts, rubber mounts or springs.

VIBCO engineers will design a table to meet your specific needs. Ask for bulletin No. 7902.

**FLAT PLATFORM TABLE**
- Low profile – as low as 2” from floor
- No vibration transfer to the floor

Vibrating platform with a working surface as low as 2” from floor. The platform table can be used under filling machines for packing drums and boxes. Low profile eliminates the need for raising machinery or breaking into the floor and makes loading and unloading heavy drums easier.

Packing more material per given volume saves costly space and lowers escalating transportation costs. Ask for bulletin No. 7902.

**GRID TOP TABLES**
- Automatic operation • Adaptable to any roller conveyor
- Lightweight yet strong

The VIBCO grid top table is designed to fit between the rollers of your conveyor. The load – drum, trash box, or box – is rolled into position. Air mounts lift the grid top and take the load off the rollers. The vibrations are activated and the load vibrated. Air mounts are deflated and the load backs on the conveyor ready to be moved along. All done in seconds without handling.

The VIBCO design uses strong lightweight rectangular tubing for more vibration transfer to the load.

For more information ask for our Foundry Bulletin and Bulletin No. 7902.

Ask for detailed brochure #7902.
**Flat Top Tables**

- Inflatable rubber mounts
- Engineered table top with supports to avoid fatigue cracks
- Speed adjuster available
- Foot pad for securing table to floor
- Electric, pneumatic or hydraulic vibrator
- Table for 5-ton concrete form
- 6’ dual table for marble sink tops
- Study table stand

VIBCO’s Flat Top Tables can be made to any specification and can handle weights from ounces to several tons. Let VIBCO’s 40 years of experience help you.

**Quality Assurance Tables**

- Patented "Live Top"
- Heavy duty all welded construction
- Variable speed control
- Inflatable rubber shocks for 100% vibration isolation
- Overload protection
- On-Off convenient foot switch

**TABLE MODEL US-RD**  
(24” x 24” x 36” High)

VIBCO’s test tables for fatigue, quality assurance & over the road transport testing are a very inexpensive solution for production floor testing.

**TABLE TOP MODEL**  
- 6 x 12
- 12 x 12
- 16 x 16
**Platform Tables**

**LOW PROFILE**

- **DRUM Packer**
  - Low profile drum packer 3” off floor - Model SC R-D P
- **Adjustable speed & force 115 volt heavy duty vibrator**
- **Runner to secure to floor**
- **Adjustable brackets for drums or boxes**
- **Shock absorber to eliminate vibration transfer**

**VIBCO’s low profile Platform Tables on or off floor scales for packing gaylords, boxes, or crates on pallets up to 48-54”.

**GAYLORD Packer**
- Gaylord packing table with rails for wood slats 6” off floor

**Grid Top Tables**

**GRID TABLE ONLY - FIT IN WITH EXISTING ROLLER CONVEYOR**

- **Heavy duty roller conveyor**
- **Spaced to fit existing conveyor**
- **Heavy duty tube construction**
- **Inflatable rubber shock absorbers to lift & lower table**

**VIBCO’s Grid Top Tables solve many filling, packing and weighing problems. Most common is the standard Grid Top Table with vibrators underneath. Below are other VIBCO solutions for weigh scale applications and vibrator placements.**

**GRID WITH CONVEYOR**
- **Heavy duty electric motor vibrators**
- **Tube construction frame for strength**
