VIBCO VIBRATORS

Smallest industrial air blaster in the world - only 4”x 6”!

- Powerful blast fluidizes any type of material
- Virtually Silent Operation
- Operates on plant air from 10 to 120 psi
- Compact, simple design for maximum flexibility and low maintenance
- Easy, fast installation
- Patented design backed by VIBCO’s engineering expertise and 24 hour technical support

Available in carbon steel or stainless steel

VIBCO's Mini-B Air Blaster is small, powerful and guaranteed to work!

Use the VIBCO Mini-B™ to fluidize all types of material – from light and powdery to heavy and coarse. It’s powerful air blast eliminates friction between any material and container walls made of steel, plastic, or fiberglass. When material clings to your bin, hopper, pipe or other material handling container, VIBCO’s Mini-B™ solves the problem! The Mini-B™ air blaster also keeps material moving in chutes, breaks bridges over rotary valves, and unclogs feeder pipes and downspouts.

The VIBCO Mini-B™ finally solves the problems of ineffective aerators and fluttering air sweeps that can only move powdery material and have small effective ranges. The effective range of the VIBCO Mini-B™ is two to three times that of a typical air sweep system. Call us today to arrange for your 30-day FREE trial!
VIBCO’s patented Mini-B™ air blaster design is perfect for sanitary applications. The unique valve closure prevents material from entering the unit, virtually eliminating the opportunity for cross-contamination. The VIBCO Mini-B™ is available in stainless steel and a variety of food and sanitary grade coatings.

**How it Works**

Our revolutionary patented design features a single moving part. Stored compressed air releases instantly via a spring-loaded piston. After a short and powerful blast, a valve immediately closes to seal off the opening so no material enters the unit. The compressed air chamber refills in milliseconds so the VIBCO Mini-B™ air blaster is capable of firing in rapid succession. A variety of fittings is available to direct the blast exactly where you need it most.

**Simple Installation and Operation**

The VIBCO Mini-B™ air blaster installs quickly and easily, and does not require regular maintenance. The patented design offers you tremendous flexibility because it operates on plant air from 10 to 120 psi. The small size of the VIBCO Mini-B™ means that you can mount it in tight areas where traditional air cannons, aerators and air sweeps don’t fit. The compact design also means that the VIBCO Mini-B™ is perfect for mobile bin applications. Use the VIBCO Mini-B™ on any style container or bin including steel, aluminum, fiberglass, and plastic.
