Model 4P-1400
Heavy Duty
Electric Vibrator**

VIBCO'S SOLUTION

VIBCO suggested a 4P-1400 Heavy Duty Electric Vibrator to remove the air getting trapped in the artificial stone. The vibrator was mounted on a table above the molds to give the best vibration possible. The product now comes out blemish-free, improving quality and increasing production while dramatically reducing waste.

VIBCO'S BENEFITS

After installing the VIBCO 4P-1400 Heavy Duty Electric Vibrator the customer received the following benefits:

- Blemish-free product
- Increased product quality and dramatically reduced rejection rates
- Higher quality produced increased demand for product and higher sales revenue

4P-1400

CONCRETE FORM

"Blemishes were forcing us to reject 50%..."

We had trouble manufacturing quality artificial stone. We couldn't get the vibration right on our rubber molds, so we ended up with air holes in our finished product. Those blemishes were forcing us to reject about 50% of what we were producing. Obviously, something needed to change. I was explaining the problem to a friend of mine and he recommended I talk to a VIBCO application expert. He was right on... VIBCO had the solution we needed and they figured out how to mount the vibrators to give us a blemish-free finish. The bonus was that my dealer was able to get the vibrators to me in just 2 days!"
