Bulletin #433
Flat Top Vibratory
Table with Model
50-3S-EM Piston
Vibrators

VIBCO'S SOLUTION

A custom-built VIBCO flat-top vibrating table with two VIBCO Model 50-3S-EM Piston Vibrators was installed directly below the filling station. Vibrators were run during the filling cycle to depeak the litter properly in the buckets. Spillage has been virtually eliminated, the fill rates are excellent and the end of shift clean up time has been significantly reduced.

VIBCO'S BENEFITS

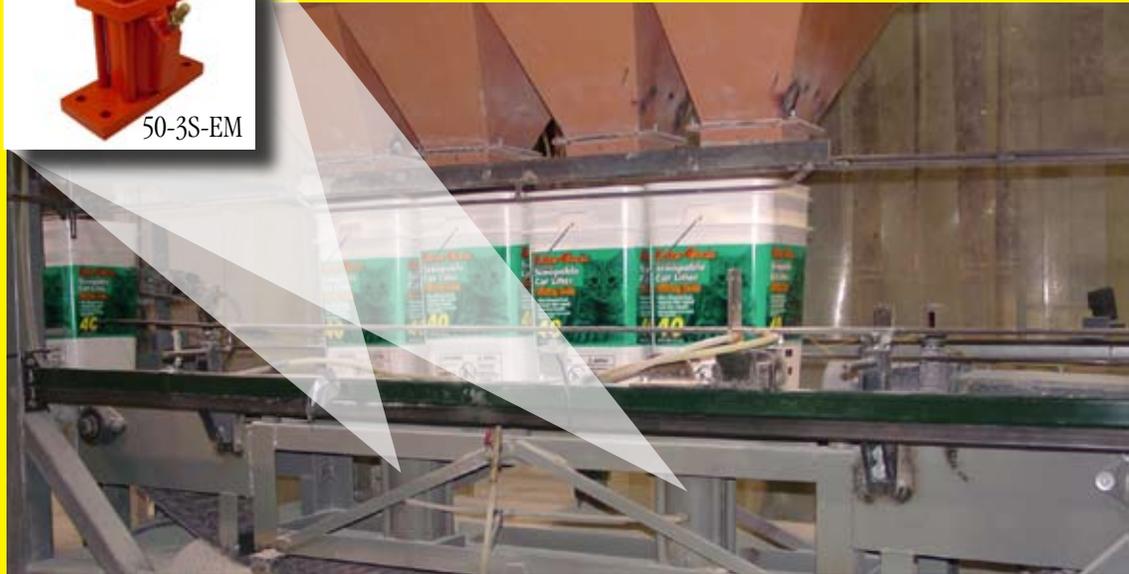

After installing the custom-built VIBCO flat top vibratory table (equipped with two Model 50-3S-EM piston vibrators) the customer received the following benefits:

- Significantly less product loss with more accurate filling
- Faster fill rates and higher productivity
- Reduced man hours required for clean up at the end of shift

(VIBCO's application of the month)

“Overfilling and spillage were costing us...

We needed to find a way to improve the efficiency of our cat litter filling station. We overfilled each container so we could get the right volume of product inside. Overfilling caused a huge amount of spillage, wasted product, and required a lot of man-hours for clean up. We talked to our equipment dealer and he recommended a custom flat-top vibrating table from VIBCO to fit under our conveyor line. The engineers at VIBCO really listened to our challenge and came up with a perfect solution. Now, every single container is filled precisely and we have almost zero spillage. Great job!”

Maintenance Supervisor

Flat Top Vibratory Table with Mike M., Tennessee
Model 50-3S-EM Piston Vibrators

- 2,300 VPM at 80 PSI
- 30 CFM at 80 PSI
- 20,000 max lbs of material
