Our portable hoppers kept jamming up...

We were having a real problem with our portable hoppers. We needed to move them from one site to another. Every time we moved them, the processed wood material inside would pack and then be a real pain to unstick. We’d have to bang on the sides of the hopper to get a flow going, and then we’d keep banging on it throughout the whole empty. It was a huge waste of labor time, the noise of the banging was awful, and we were risking someone getting hurt while swinging the hammer. I’m really glad that equipment dealer came for a visit with John V. from VIBCO. We now have a solution that works great!

Plant Manager,
Steve B., Kentucky

Model BVS-320
Silent Pneumatic Turbine Vibrator

- 6,800 VPM at 80 PSI
- 600 lbs of force at 80 PSI
- 10 CFM at 80 PSI
- 70 dB at 80 PSI

Alternate Models
- Model 2P-150-1 VIBCO Single Phase Electric Vibrator
- Model 2P-150-3 VIBCO Three Phase Electric Vibrator
