Add VIBCO's **BIG BERTHA™** to your dump body and
SHAKE IT, DON'T BREAK IT!

**The Challenge**

"Tailgate slamming and over-extended hoists were causing a lot of damage. We were constantly repairing tailgates, body hinges, linkages, lights, hoist packing glands - the list goes on. Equipment was being abused and we had a lot of downtime for repairs - which all meant lower profits."

Shop Foreman
Timothy Y., Pennsylvania

**VIBCO's Solution**

A VIBCO DC-3500 Big Bertha™ 12V DC Dump Body Vibrator was installed and virtually eliminated all tailgate slamming. Body hoists no longer needed to be "stretched beyond their stage stop limits" reducing wear and tear, and reducing the risk of roll-over. An added benefit of the Big Bertha™ vibrator is that spreading can be done while dumping, reducing truck time and man-hours, and increasing the number of loads dumped in any given day.

**The Benefits**

After installing the VIBCO DC-3500 Big Bertha™ 12V DC Dump Body Vibrator, the customer received the following benefits:

- Dramatically reduced the number of costly repairs. According to this customer, "The VIBCO Big Bertha vibrator literally paid for itself in 2 weeks on the job!"
- Increased the number of loads per day
- Greatly reduced the chance of truck roll-overs
- More time on the road, not in the shop

Model DC-3500

**BIG BERTHA™ 12V DC Battery Operated Vibrator**

**Tech Specifications**

- 3500 lbs Force
- 4000 VPM
- 70 dB
- 12-Volt DC power standard
