Are you fed up with high product rejection rates? **VIBCO has a very sweet solution.**

**Product Application Bulletin #492**
**Model SCR-500 Adjustable Speed & Force Electric Vibrator**

**VIBCO’S SOLUTION**
A VIBCO SCR-500 Adjustable Speed & Force Vibrator was mounted to the underside of the conveyor. Now the chocolate and marshmallow spread evenly and consistently, resulting in a higher-quality product with a much lower rejection rate. The adjustable speed gave the customer the ability to tailor the vibrator speed for optimum results.

**VIBCO’S BENEFITS**
After installing the VIBCO SCR-500 Adjustable Speed & Force Vibrator, the customer received the following benefits:
- Dramatically reduced rejection rate
- Improved product quality
- Greatly reduced product loss
- Customized vibration with adjustable speed to optimize results

"Our rejection rates were way too high...

We had a 25-30% rejection rate on this production line. At 660,000 pieces per day, that’s a whole lot of wasted product. We had been using oscillators, but they didn’t spread the chocolate and marshmallow evenly. My production manager had suggested that we switch to vibrators - I wish we’d listened to him sooner! Our rejection rate is down to about 5% and the quality of our candy is better and more uniform. The adjustable speed is great - it allowed us to fine tune the vibration to get just the right results. Thanks!"

**Plant Engineer**
Jim L., Pennsylvania

**Model SCR-500**
**Adjustable Speed & Force Electric Vibrator**
- 950-2500 VPM continuous duty
- 2500-4000 VPM intermittent use
- 500 lbs of force
- 70 dB on A-Scale at 1 meter
- 115/230 Volt

**CLICK HERE FOR ADDITIONAL TECHNICAL INFORMATION**

**ALTERNATE MODELS**
- Model MLT or MLT-SS Silent Pneumatic Turbine Vibrator for sanitary applications
- Model BVS Silent Pneumatic Turbine Vibrator with threaded exhaust
