

When lives depend on the quality of your product...  
**Thank you for using VIBCO.**

We're the **CONCRETE** Vibrator Guys.™

**Product Application  
Bulletin #456  
Model SVRL-6500  
High Frequency  
Pneumatic Vibrator**

**VIBCO'S SOLUTION**

VIBCO application engineers recommended the customer use SVRL-6500 High Frequency Pneumatic Vibrators. They were mounted to the bridge footing forms so that the vibration would be properly distributed throughout the form. The result was a perfectly consolidated, strong, and blemish-free product.

**VIBCO'S BENEFITS**

After installing the VIBCO SVRL-6500 High Frequency Pneumatic Vibrators the customer received the following benefits:

- Perfectly consolidated concrete
- Superior quality product requiring no hand-finishing
- Stronger, safer end product

**CONCRETE FORM VIBRATORS**

**“Lives depend on the strength of our product...”**

We were casting footings for vertical bridge supports. Obviously, when you're building roads and bridges, the quality has to be perfect. We needed vibrators that would produce the proper consolidation and a superior finish. The safety of the bridge and the future of our business depend on the strength and quality of our product. After speaking with a VIBCO application engineer, we determined that SVRL-6500's were the right vibrators for the job. The result was properly consolidated footings that required zero hand-finishing!”

Project Manager  
John T., Rhode Island

**Model SVRL-6500  
High Frequency Pneumatic Vibrator**

- 10,000 VPM at 100 PSI
- 58 CFM at 100 PSI
- 7,200 lbs of force
- 98 dB on A-Scale at 1 meter
