CONCRETE PUMP

PRODUCT APPLICATION BULLETIN

Model DC-60 Electric Concrete Pump Vibrator

Technical Specifications

- 3600 VPM (max. speed)
- 60 lbs of force
- 12 VDC (24 VDC optional)
- 68 dB (low noise)

PROBLEM

The customer was experiencing material build up in the concrete pump hopper grate. When pumping a stiff mixture of cement, they often had to manually force the material through the grate. This slowed down the pumping process considerably and made it very labor intensive.

SOLUTION

One VIBCO DC-60 12 Volt DC electric vibrator was mounted to the grate of the concrete pump hopper. When the material built up, the vibrator was activated and the material flowed easily through the hopper grate.

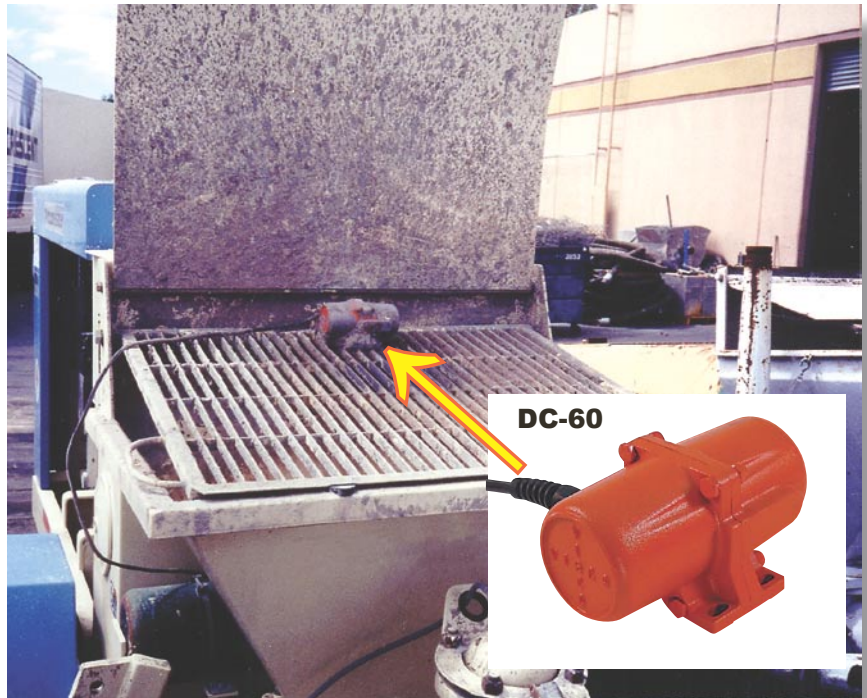

BENEFITS

After installing the DC-60 12 VDC electric vibrator on the concrete grate the customer received the following benefits:

- Increased productivity: concrete pump grate did not clog anymore
- Eliminated lost labor hours: no need to manually force materials through the concrete grate

These Also Work:

- Model BVS-250 Pneumatic Vibrator
- Model B-250 Hydraulic Vibrator
